

The problem

More than 1 billion people around the world do not have access to clean water. That is about one sixth of the global population. More than 4,000 children die every day from water-related diseases and the problem is getting worse. Access to clean water transforms communities and leads to better health, education and employment.

**Make a difference.
SAVE WATER. SAVE LIVES.**

watershed

SAVE WATER. SAVE LIVES.

The Pledge

- In buying this bottle...
- I promise to save water and save lives.
 - I promise to use water wisely and not to waste this precious life-saving resource.
 - I promise to transform my own habits in order to change the world.

**I bought this bottle for £10
and gave a family clean,
safe water for life!**

Each person should drink 8–10 glasses of water a day. Refill this bottle to be healthier and use the money you would have spent on water to transform the lives of some of the 1 billion people who don't have clean, safe water.
